

Company Profile

PROMAX

CONTRACTING

MISSION STATEMENT

To maintain our status as a leader in technical services and engineering by providing our clients with the highest quality, most comprehensive services ensuring their increased safety, reliability, and profitability.

Promax will achieve this by adhering to its core values; providing services that will enhance the availability of the client, while minimizing financial loss due to unplanned outages. **Promax** will deliver ongoing project cost-savings by decreasing maintenance costs through consistent, efficient and accurate inspections and engineering services, inclusive of prioritized recommendations, capital budgeting, scheduling, and resource allocation for future outages. Also, our clients have acquired markedly improved safety records as a result of the premier services we provide.

VISION STATEMENT

Promax differentiates itself from its competitors by providing services to clients that have enabled them to be most cost-effective and thus, actually impact the bottom line profitability of its customers.

It is important for Promax to support the client's planning team, and we provide a supporting role in the entire management process, offering vital assistance in all technical services and engineering disciplines. Support services are provided throughout the whole process, as it is imperative to identify that process, and where **Promax** integrates synergistically with its clients.

Promax strives to be the premier technical service and engineering consulting company for the utility, power, chemical, refining, food processing, pharmaceutical, and manufacturing industries, regionally and ultimately across the nation. We will achieve this primarily through the continuous enhancement of our operational and technical capability, to provide clients the best value proposition.

THE TEAM

| | |
|--|--|
|  <p>Engr. Shoeb Khan (Managing Partner)</p> | <p>Having Civil Engineering Degree and 16 years experience in the fields of Civil Works / All Kinds of Interior Works as well as Glass & Aluminium Works.</p> <p>He has strong leadership skills to turn the company business towards prosperity and having multiple resources for execution of the projects with precision and timely execution respectively.</p> <p>Shoeb has in depth knowledge and handles all the matters pertaining to technical executions.</p> |
|  <p>Engr. Ahmed Tariq (Managing Partner)</p> | <p>Ahmed is a KNX Automation Engineer from Building Automation Center Lebanon and is a highly skilled Entrepreneur with strong background in Repair and Maintenance works in all kinds of Industrial Buildings with more than 18 years of working experience in different key positions. Ahmed has high level of understanding and in depth knowledge in the fields of all kinds of Waterproofing Solutions in metal roof & concrete roof. In addition to this, he is having vast knowledge in KNX Home Automation, LED Industrial Lighting Designs and implementation as per International Standards, CCTV Security Systems, Aluminum Pergolas fixed and automated types, Car Parking Shades, Solidworks Design Engineering, Microsoft Certified Web Developer, 3D Simulations in Dialux Evo 10, Adobe Premier Pro, Adobe Photoshop, 3D Max, Networking Solutions and other state of the art computer programs for precise design / calculations and project estimations.</p> |
| <p>Project Manager</p> | <p>Engr. Shahab Khan</p> |
| <p>Admin & Accounts Manager</p> | <p>Mr. Hilal Ahmed</p> |
| <p>Site Supervisor</p> | <p>Mr. Jehan Hussain</p> |
| <p>Site Supervisor</p> | <p>Mr. Nadeem Khan</p> |
| <p>Project Incharge</p> | <p>Mr. Bilal Ahmed</p> |
| <p>Skilled Labours</p> | <p>10 Nos.</p> |
| <p>Ordinary Labours</p> | <p>25 Nos.</p> |

LIST OF TOOLS & MACHINERY

| 5. | Steel Girders | 25 Nos. |
| 6. | Scaffolding Pipes (8', 10', 12' & 20' long) | 424 Nos. |
| 7. | Joints | 1500 Nos. |
| 8. | Mixer Machine (1-Bag) | 2 Nos. |
| 9. | Mixer Machine (1/2 Bag) | 3 Nos. |
| 10. | Vibrator: - <ul style="list-style-type: none"> • Mechanical • Electrical | 2 Nos. 2 Nos. |
| 11. | Level with Tripod (Complete) | 2 Nos. |
| 12. | Generator Set (15 kVA) | 1 No. |
| 13. | Water Pump and Engines (Different Capacity) | 5 Nos. |
| 14. | Welding Plant & Kits | 3 Nos. |
| 15. | Steel Cutter | 2 Nos. |
| 16. | Grinder | 4 Nos. |

Note: Additional tools, equipment and machinery etc. is arranged as per requirement of the project.

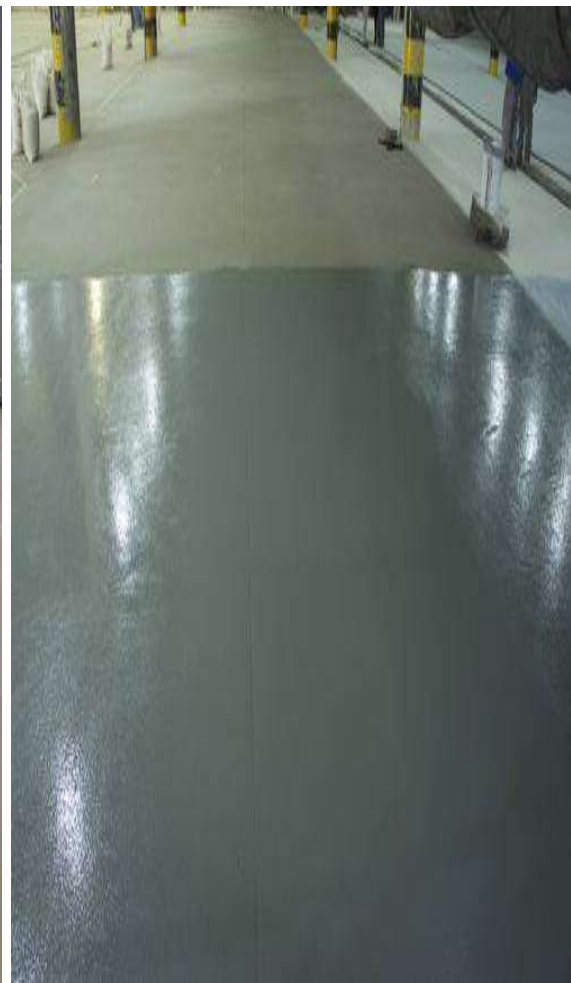

SERVICES

- All Kinds of Epoxy Flooring for Industrial Buildings
- Waterproofing Solutions for Concrete and Metal Buildings
- Column Treatment
- Eave & Gutter Waterproofing
- Single Skin Roofs / Sandwich Panel Roofs
- Rusted Purlin Replacement
- Concrete Parapet Wall Waterproofing
- Pipe Penetrations
- Manual / Automatic Pergola's
- Revamping of Corporate Offices and buildings
- Revamping of Villas and apartments
- Revamping of Banks and Industry Outlets
- Renovations, Refurbishments & facelifts
- Supermarkets, Hypermarkets & Warehouses
- All Types of Aluminum and Glass Work
- All Types of Carpentry Work
- All Types of Gypsum Work
- All Types of Tiling and Flooring Work
- All Types of Electrical Fixture Work
- Aluminum Doors and Windows
- Glass Doors and Partitions
- Hand Rails
- Stainless Steel Cladding

Different Types of Epoxy Flooring Coatings

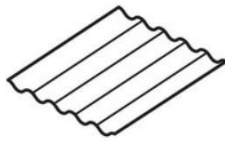

CONCRETE

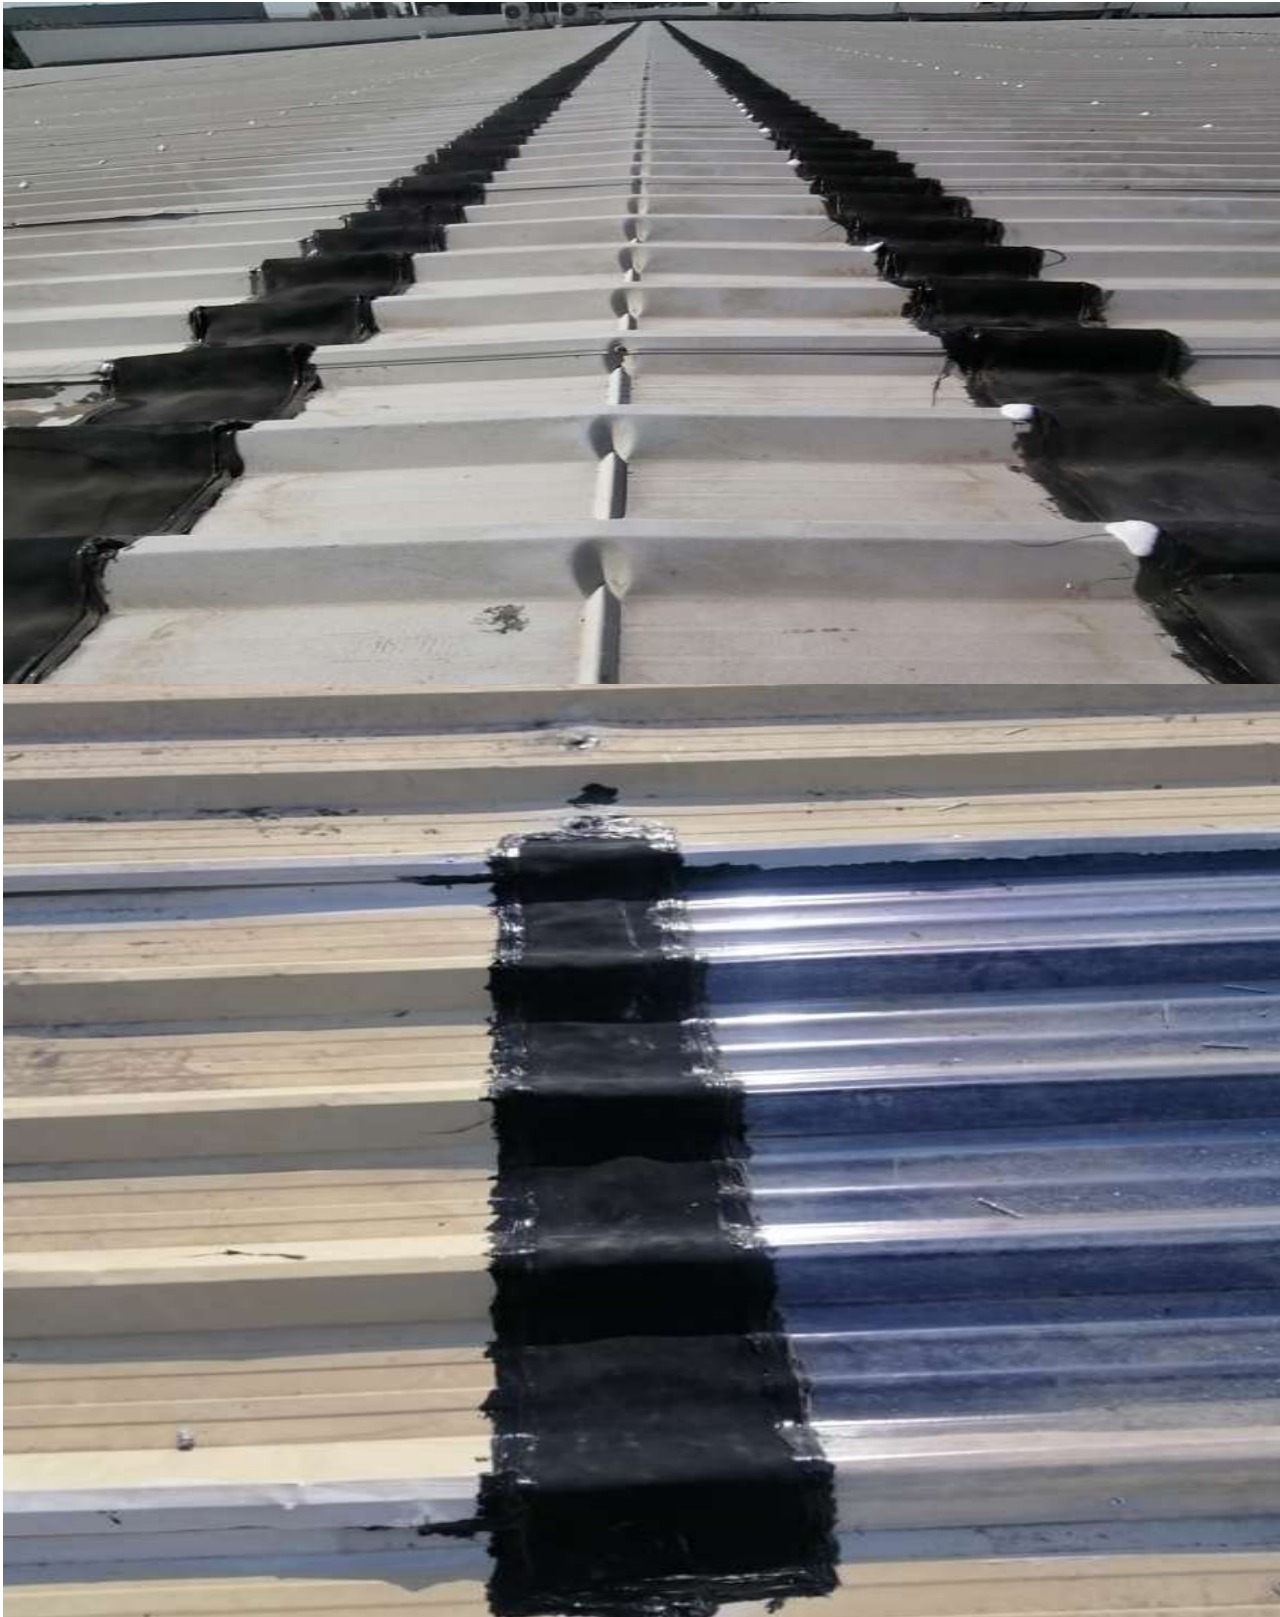

CONCRETE ROOF WATERPROOFING

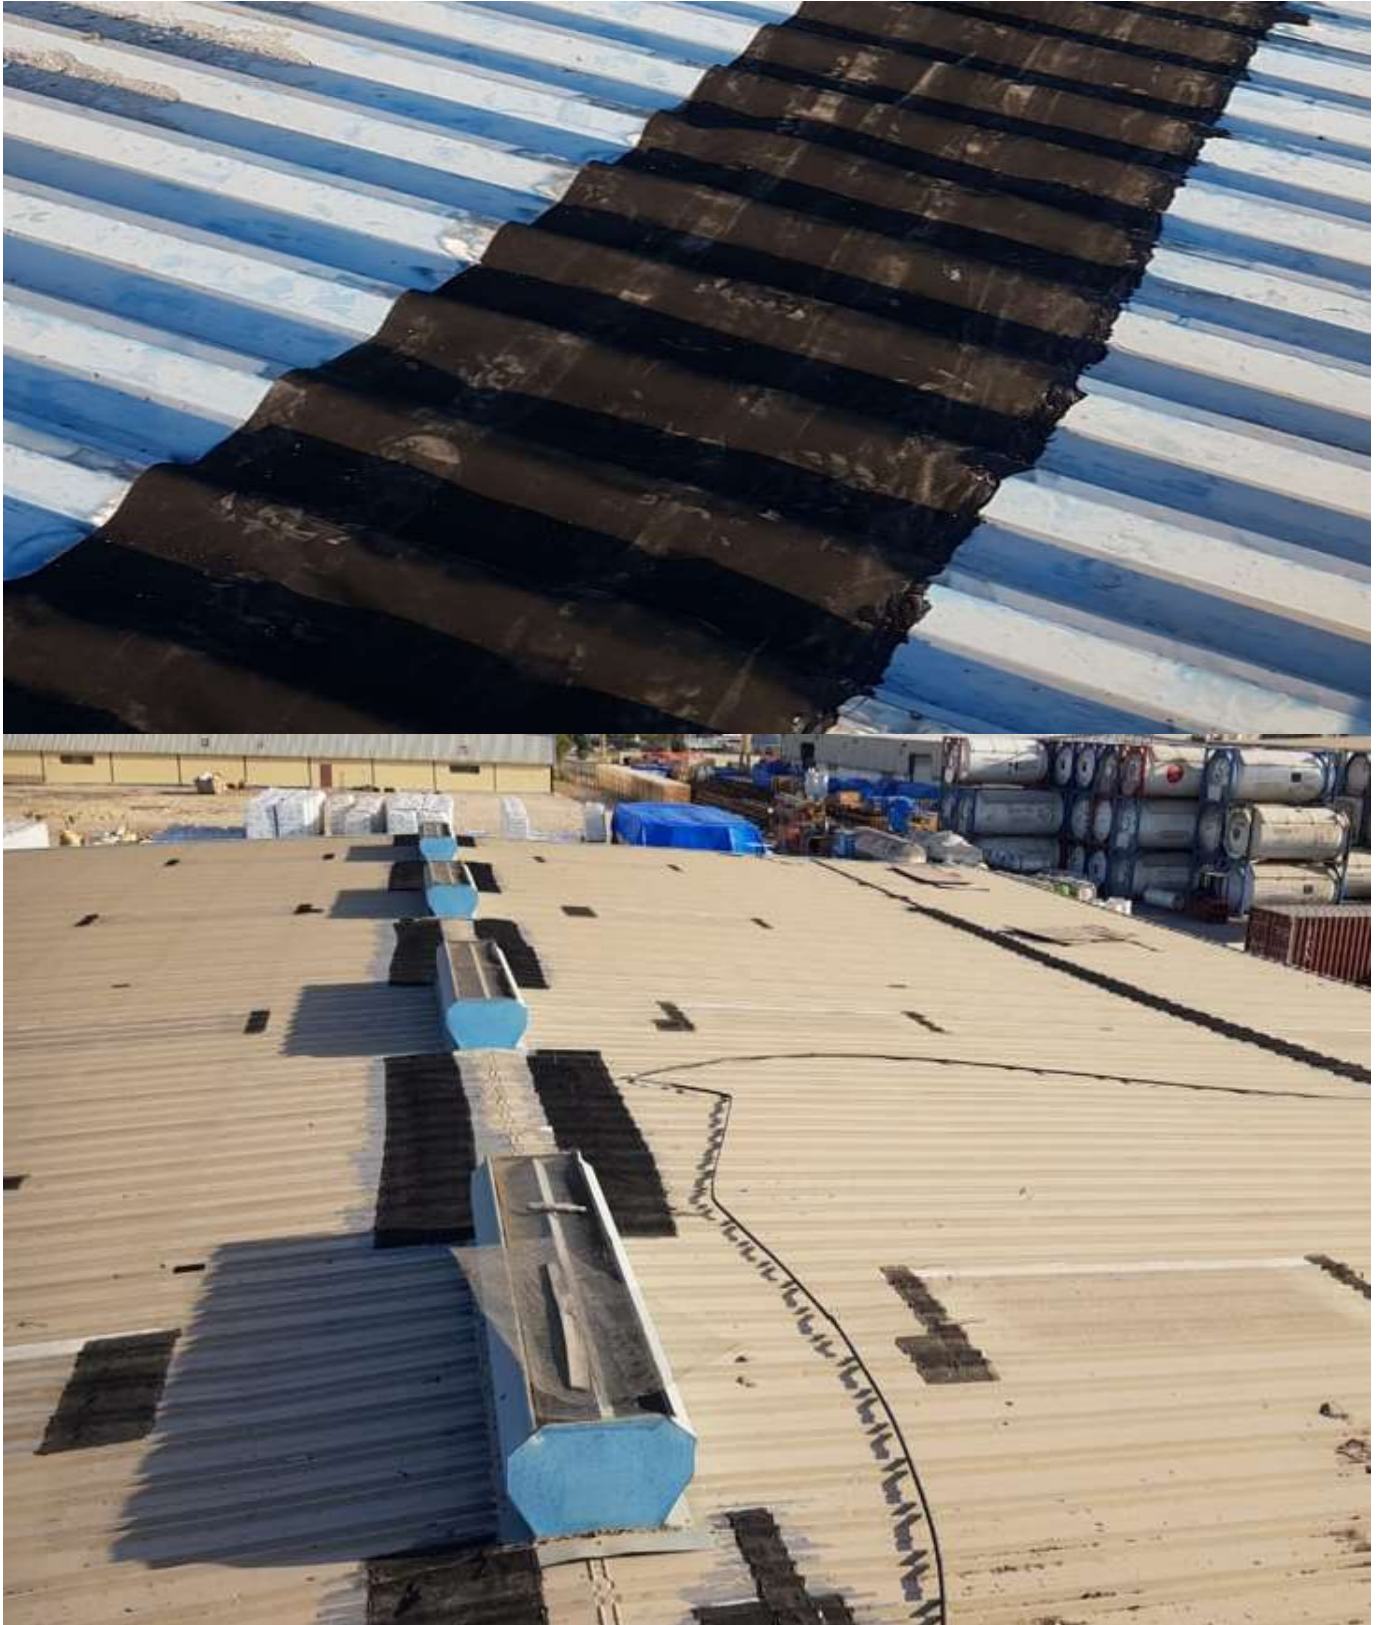

METAL ROOF WATERPROOFING

RESERVOIR TANK WATERPROOFING

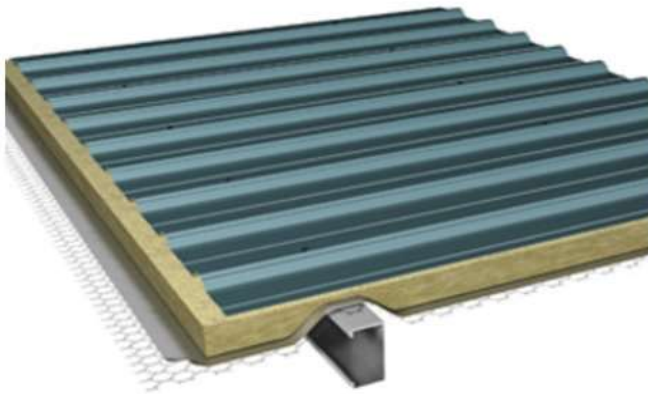

SINGLE SKIN / DOUBLE SKIN / PURLIN REPLACEMENT

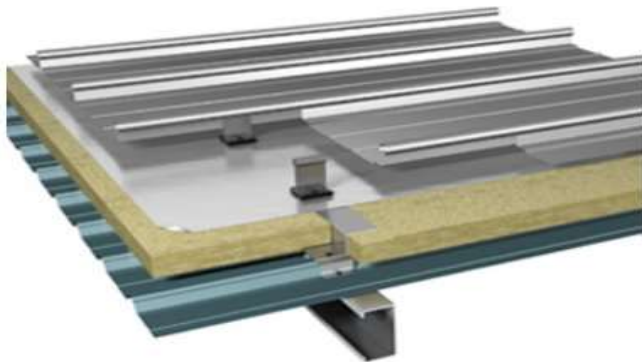

SINGLE SKIN ROOF SYSTEM

In single skin roof system, insulation is installed below the metal cladding sheet held by steel wire mesh and aluminum foil rolled over purlins. This roofing system is an economically sound option for the construction industry. ThermalRock B, a non-combustible light weight thermal insulation blanket provides an ideal insulation solution to single skin roofing system.

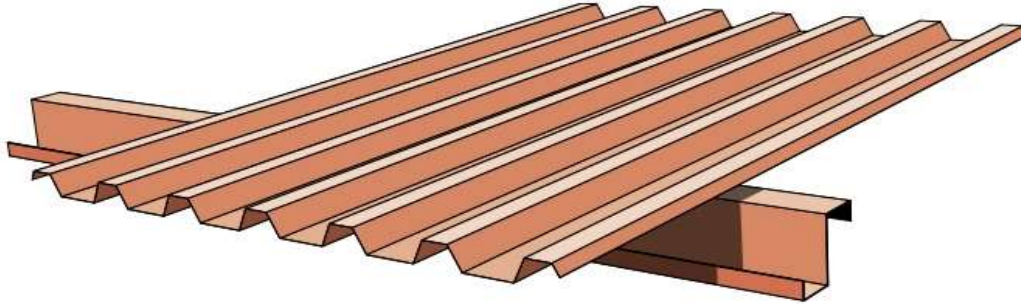

DOUBLE SKIN ROOF SYSTEM

The double skin roofing system is a high performance system comprising of an aesthetically designed trapezoidal or standing seam profile metal sheet on the top and a metal trapezoidal tray at the bottom. Coupled with ThermalRock S stone wool insulation, it boost the performance of the system with improved level of thermal efficiency, acoustic and fire performance as compared to other roofing system. ThermalRock S, a semi rigid slab product, is a versatile insulation that is available in various sizes to provide ease of installation and a perfect fit between purlins.

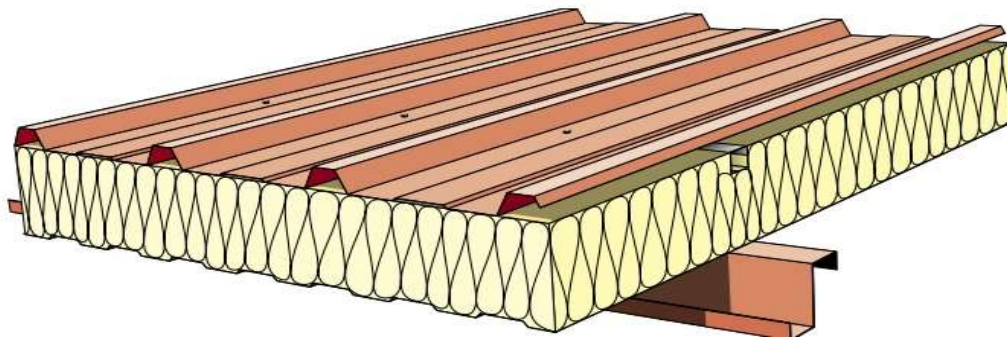

1.2 Single skin system

An uninsulated profiled metal sheet fixed directly to the purlins.

1.3 Double skin system

This common type of construction consists generally of a shallow profiled metal liner, a spacer system and an outer sheet usually in a deeper profile. The insulation is typically a mineral fibre quilt.

2.1 Profiled sheets

Profiled weather and liner sheets are made of steel to BS EN 10147 or aluminium to BS EN 485 (and related standards).

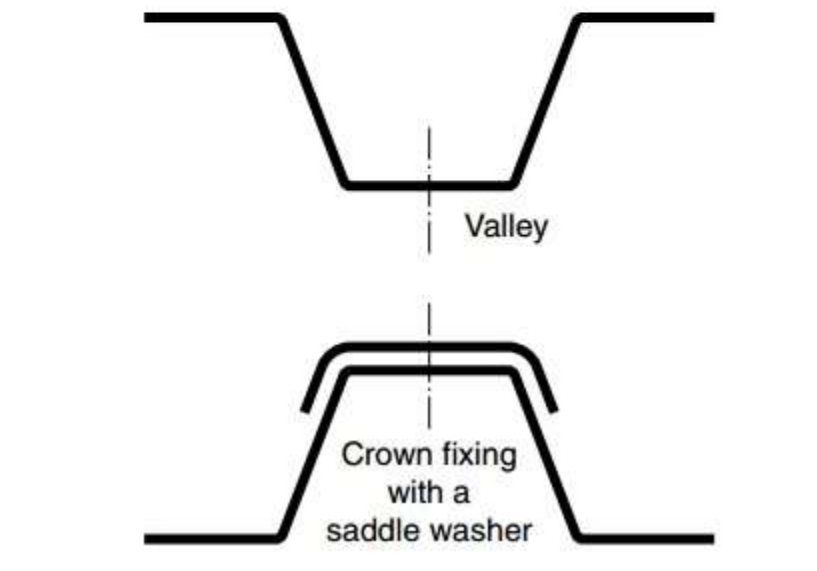

Thicknesses vary depending on product and application but the values in Fig 6 are generally regarded as minimum values in mm.

| | STEEL | ALUMINIUM |
|----------------------|-------|-----------|
| Weather sheet | 0.7 | 0.9 |
| Liner sheet | 0.4 | 0.5 |
| Walkable liner sheet | 0.7 | 0.9 |

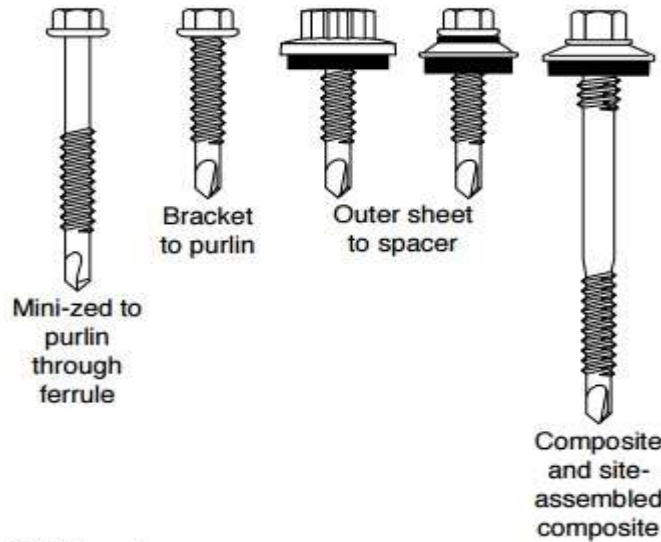

| Type | Substrate | Typical thickness: microns | Application |
|-----------|---------------------|----------------------------|--------------|
| Plastisol | steel | 200 | weathersheet |
| Pvf2 | steel and aluminium | 25 | weathersheet |
| Multicoat | steel and aluminium | 100 | weathersheet |
| ARS | aluminium | 28 | weathersheet |
| Polyester | steel and aluminium | 22 | liner |

a) Primary

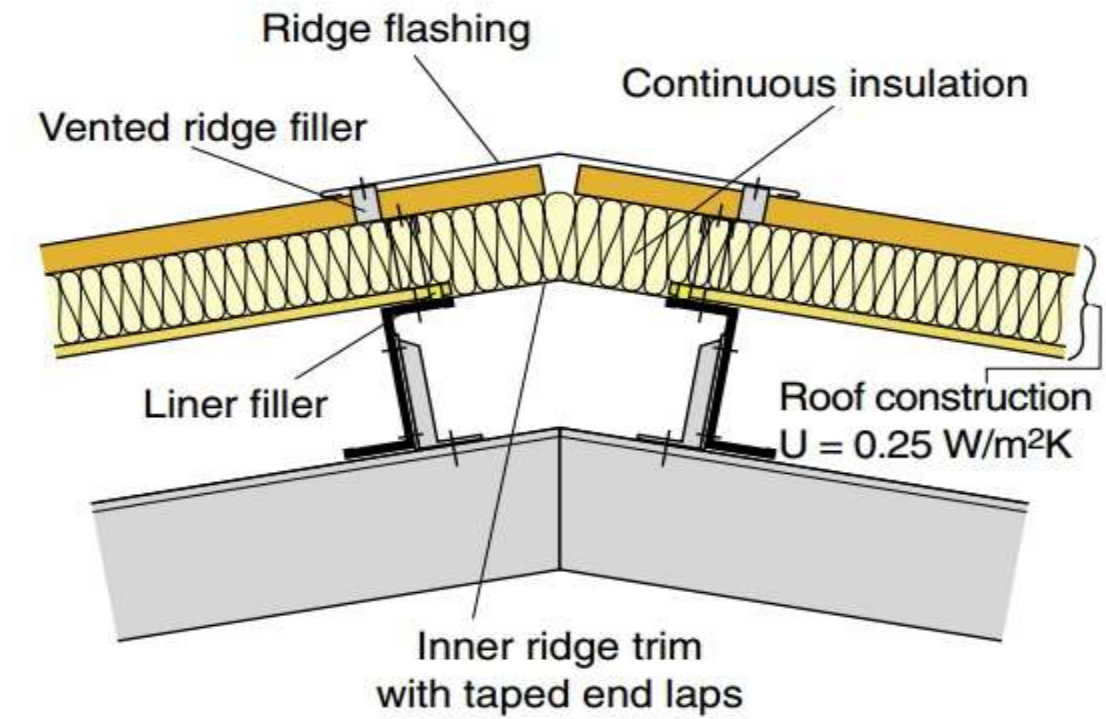

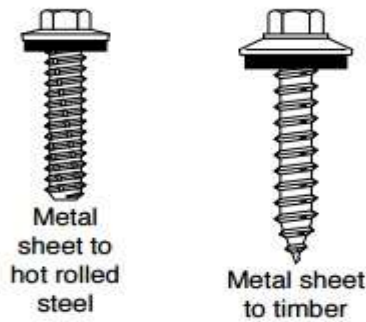

These fasteners are designed to transfer all loads on the cladding system back to the supporting structure so their strength is particularly important. If the fasteners are exposed they must also provide a weathertight seal. They are normally used in the valley of the profile. If crown fixing is recommended by the manufacturers, saddle washers are usually required.

Self drilling and tapping

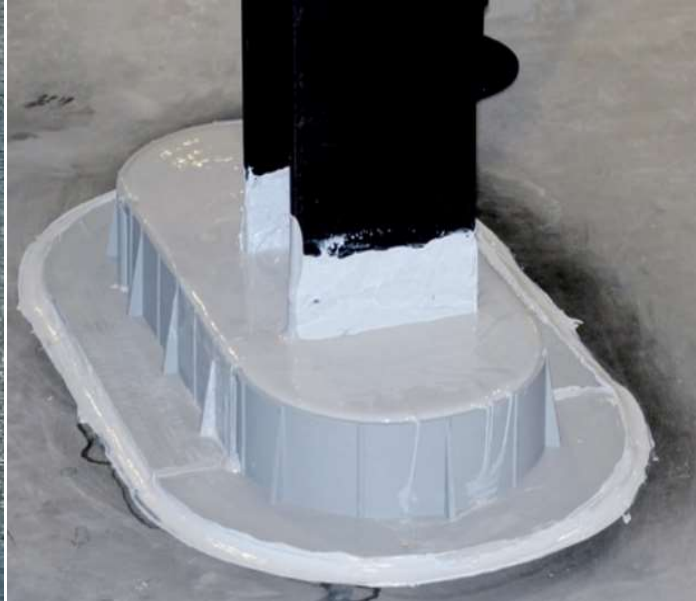

Self tapping

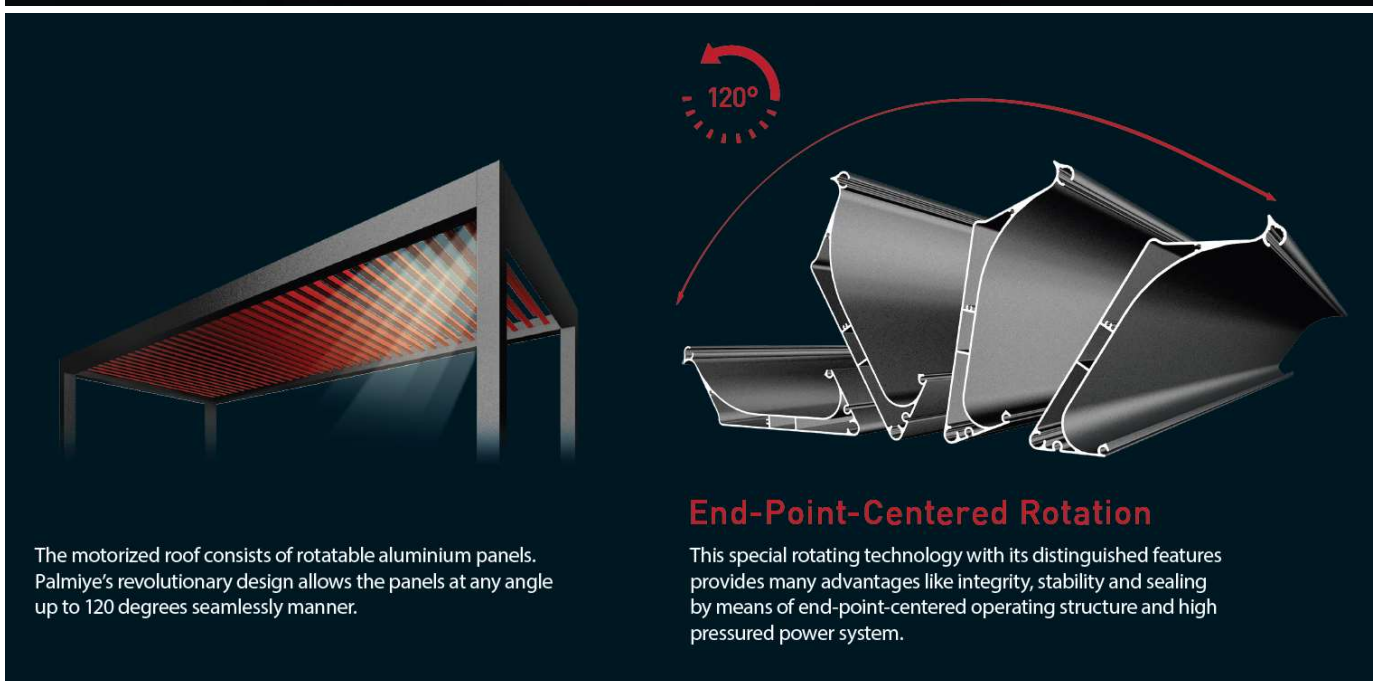

COLUMN TREATMENT / PIPE PENETRATION / CABLE WATERPROOFING

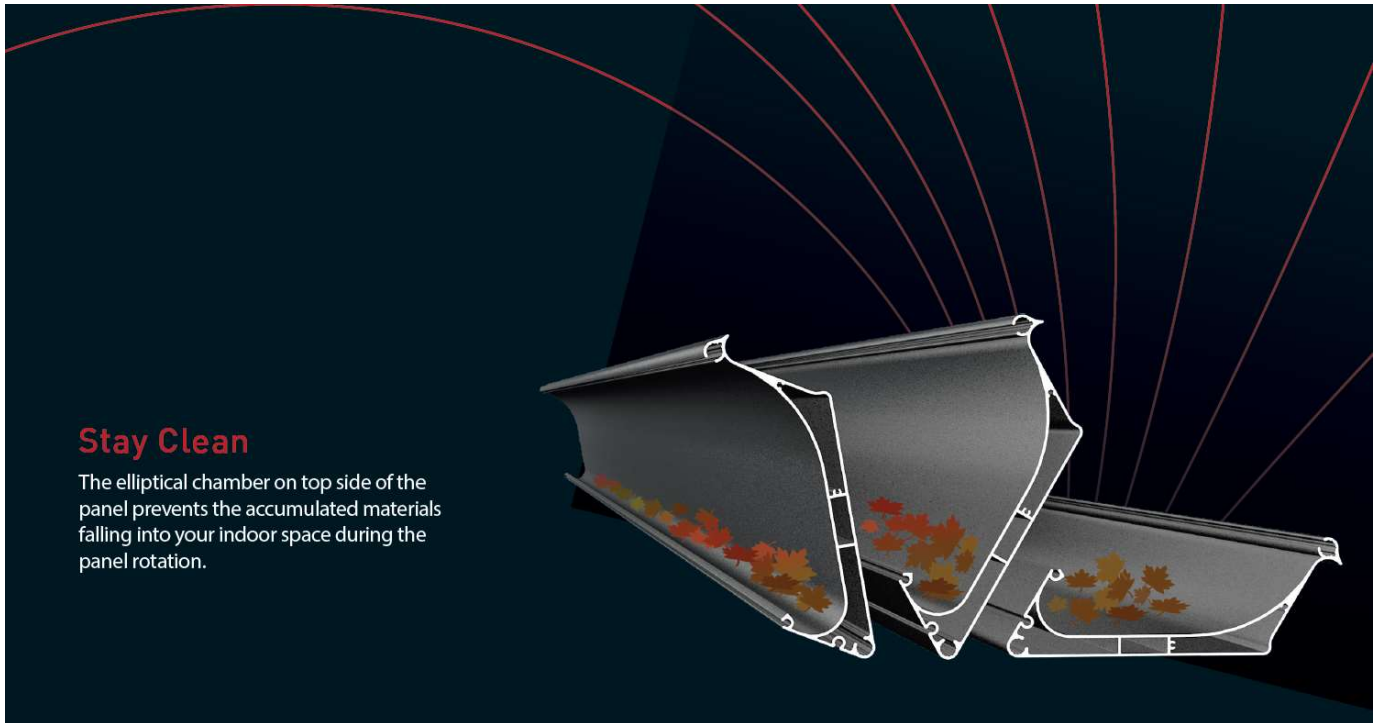

MANUAL / AUTOMATIC ALUMINIUM PERGOLA'S / GAZEBO

The motorized roof consists of rotatable aluminium panels. Palmiye's revolutionary design allows the panels at any angle up to 120 degrees seamlessly.

End-Point-Centered Rotation

This special rotating technology with its distinguished features provides many advantages like integrity, stability and sealing by means of end-point-centered operating structure and high pressured power system.

Integrated Drainage System

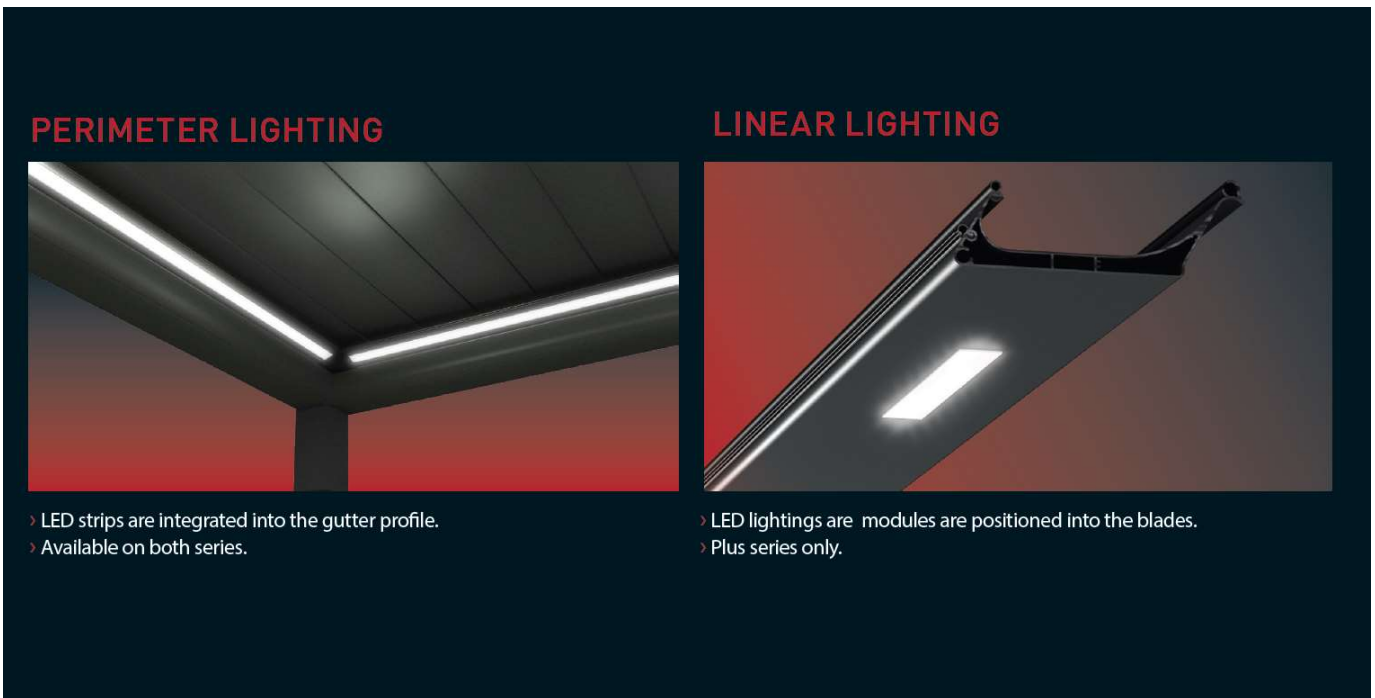

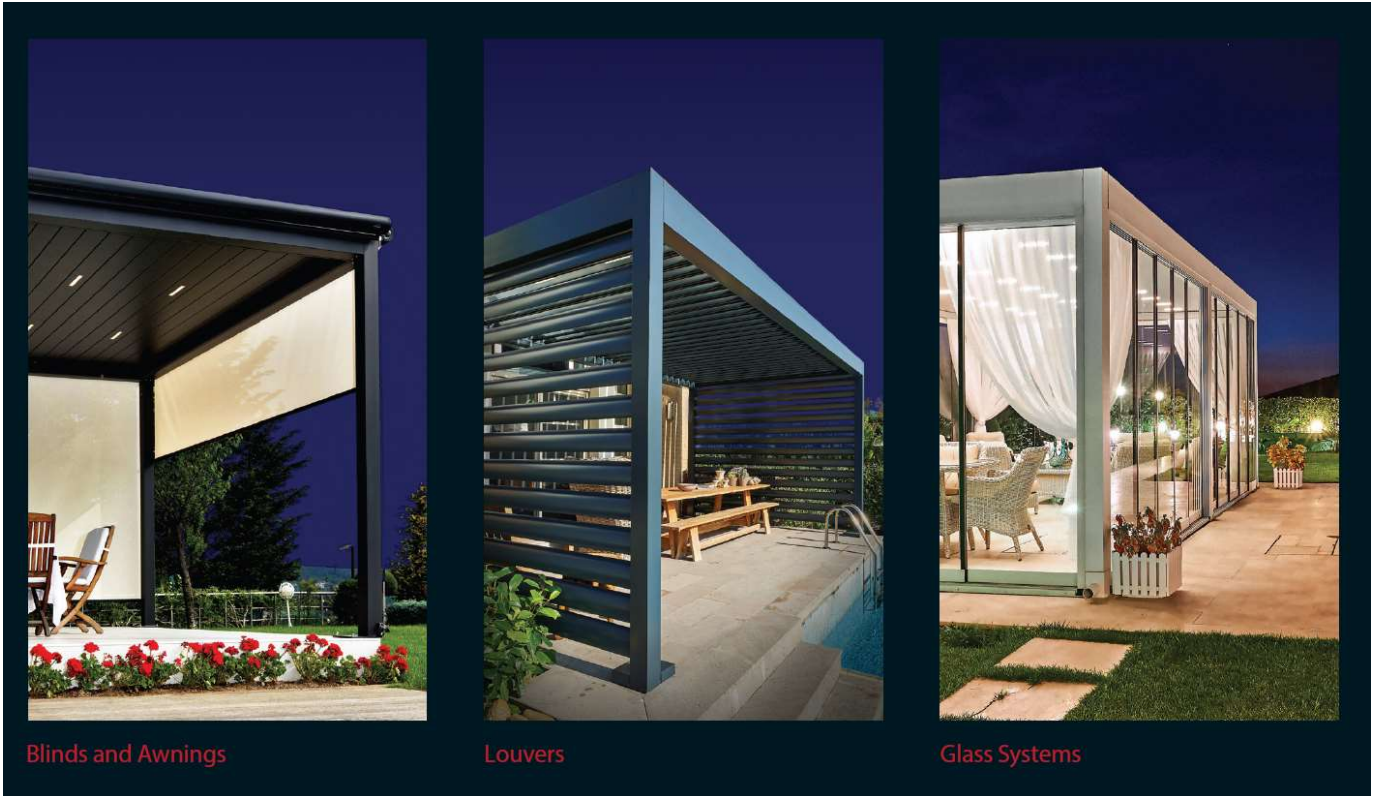

The hidden section of the drainage system is ingeniously integrated.

Specially designed aluminum panels guide the water through integrated gutters on all sides.

Water evacuates from the Integrated Beam.

Detailed Site Survey's and Relevant Reports for problem identification and providing appropriate solutions:

GUTTER PROBLEM

The major problem is the Pigeons, as they consider the gutter holes to be their nest and then they enter in it and die causing serious blockage.

So these should be covered with floor trap / gutter cover to prevent them for entering. Now when they go in and die the water clogs up and then slips in between the sheet and gutter terminations as explained above.

AREA 3

SOLUTION:

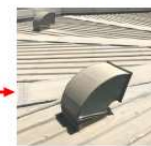

All the overlaps needs to be cleaned properly by removing the old coatings and to be sealed with the imported EPDM on both the sides as well as we need to seal the 2 x Duct Penetrations shown here.

Total Diameter Length is 60 Meters of the Gutter of this round roof. All proper drains are here in this area as it has 8 Drains of around 3" Dia which is sufficient.

However there are 10 overlap areas that are covered with the older coating which seems to be cause of the leakage. The length of each duct from end till the center is 9 Meters.

And each overlap has 2 sides. Therefore, 9 Meters x 2 Sides x 10 overlaps = 180 LM

This area also has 2 Duct Penetrations inside the roof which is around 1 Meter x 4 sides x 2 Duct Penetrations = 8 LM

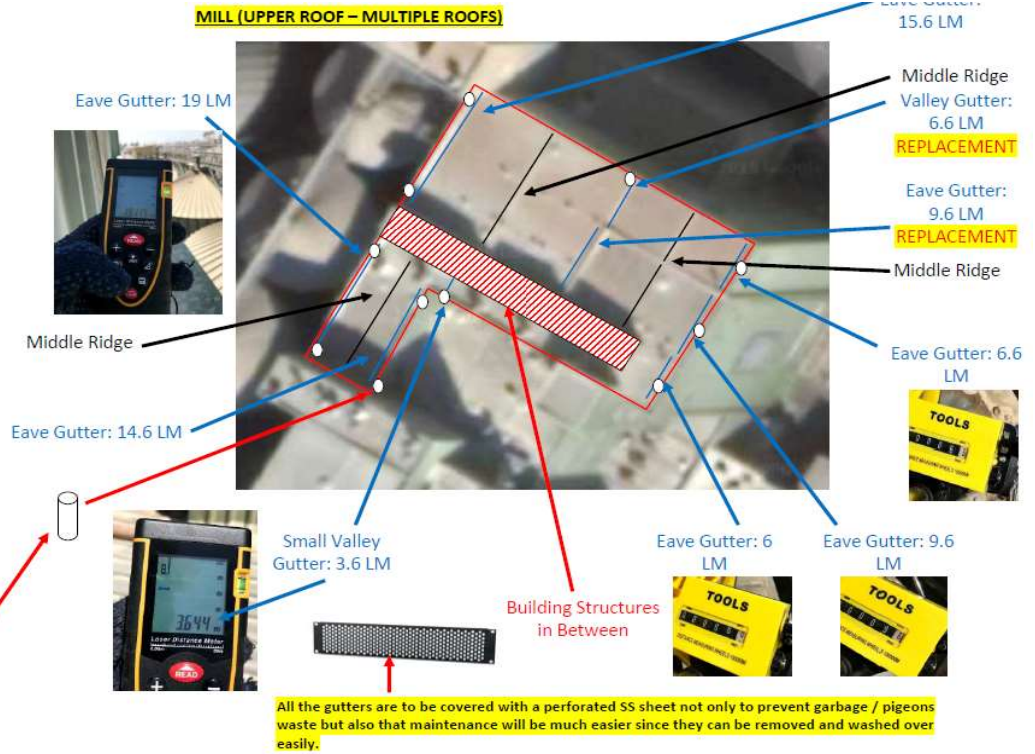

Full Panoramic View of this roof taken from this point.

This has multiple Gutters & Middle Ridges. Its difficult to explain this roof, The area marked within the red line is the roof areas. The Area marked with white background and red lines are building structures in the middle. However, it is explained in detail in the best possible way.

Gutters are marked with **BLUE** Lines

Middle Ridges are marked with **BLACK** Lines

11 X Core Cuts required

WATERPROOFING OF METAL ROOF:

TOTAL AREA: 7620 SQ. MTRS

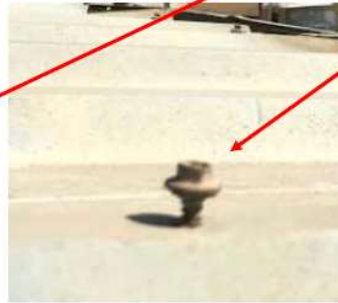

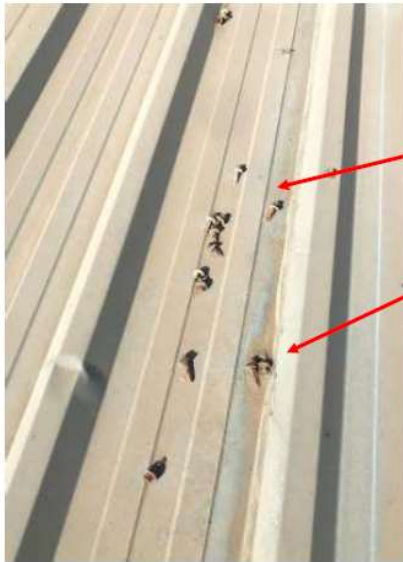

Total Number of Laps = 8 Nos.

Different Size Laps =
77+77+90+85+85+82+82+79=657 LM

Sky Lights = 83 Nos.

Each Skylight 8 LM x 83 Nos. = 664 LM

Flashing repairs = 40 LM Approx.

There are many places where the screws are backed out and are missing Including rivets as well. These needs to be replaced with the new ones and sealed with our ceramic coatings wherever required to close the openings. Entire roof to be cleaned thoroughly, removal of existing coatings, replacement of damaged / torn out screws and rivets and then sealed properly with the ceramic coatings on the entire roof of **7,620+8,330 = 15,950 sq. meter area.**

AREA SEGREGATIONS / TOTAL SCOPE OF WORK (Sr # Are based on the Proposal)

Office Block – Concrete Roof (Sr. 1 & 2)

- Applying of EPDM 1mm thick with its adhesive at the substrate and termination sealing with German Adhesives complete in all respect.. Area # 175 Sq. Mtr. + 15% for the Wall Uplifting = 200 Sq. Mtr

Waterproofing of AC Penetrations with M1 German Sealant – 8 Nos.

Roof # 1 – Metal Roof (Sr. 3 & 4)

Total Area: 995 Sq. Mtr. consisting of 5,970 Screw Heads

Sealing of TOTAL END LAPS: Main Warehouse: End Laps x 4 Nos. x 55 LM = 220 LM x 22% corrugation Slope = 270 LM

Roof # 2 – Metal Roof (Sr. 5, 6, 7, 8 & 9)

Total Area: 2500 Sq. Mtr. consisting of 15,000 Screw Heads

Sealing of TOTAL END LAPS:
1st Side: End Laps x 2 Nos. x 55 LM = 110 LM + 3 x End Laps x 45 LM = 135 LM = Total LM = 245 x 22% corrugation Slope = 300 LM

2nd Side: End Laps x 2 Nos. x 88 LM = 176 LM + 2 x End Laps x 75 LM = 150 LM = Total LM = 326 x 22% corrugation Slope = 398 LM Grand Total LM = 698

Replacement of old Damaged Flashing with the new 0.7mm thick Aluminium Flashing i.e. 300mm wide and 15 LM Long

Both side flashing waterproofing = 15+15 LM = 30 LM

Replacement of damaged bended sheets with the new 0.7mm sheet of matching profile upto 25 LM and 2 Meter Wide

Roof # 4 – Metal Roof (Sr. 12 & 13)

Total Area: 2420 Sq. Mtr. consisting of 14,520 Screw Heads

Sealing of TOTAL END LAPS: End Laps x 7 Nos. x 50 LM = 350 LM x 22% corrugation Slope = 427 LM

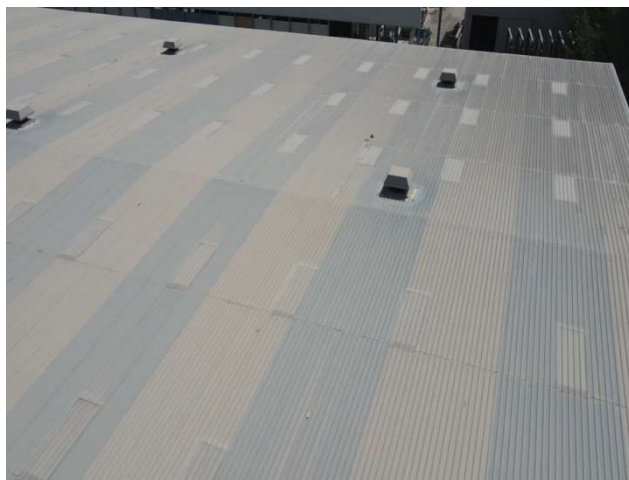

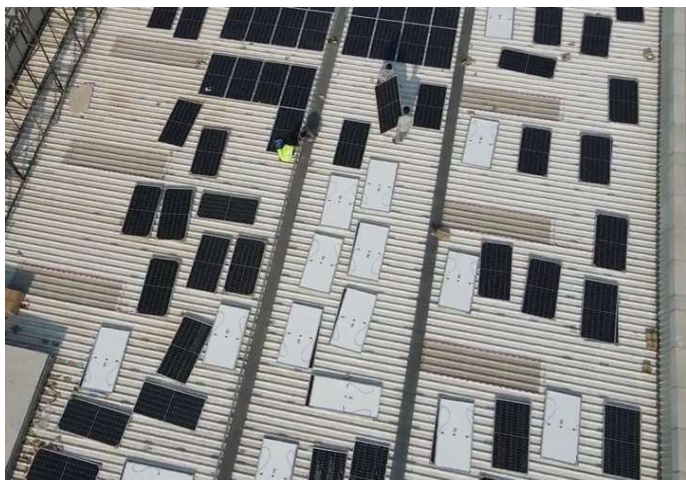

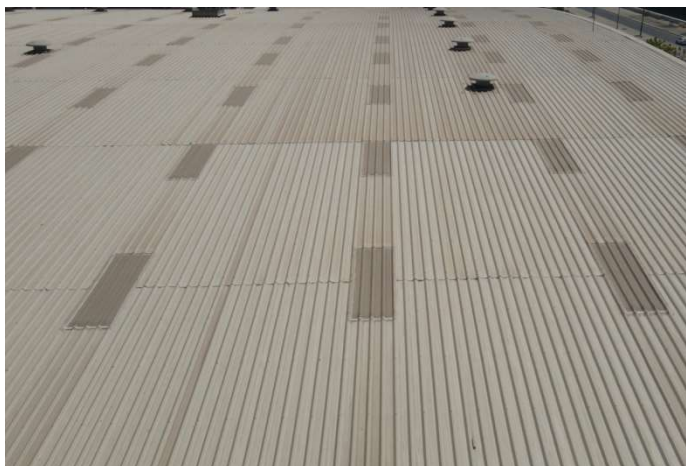

Roof # 3 – Metal Roof (Sr. 10 & 11)

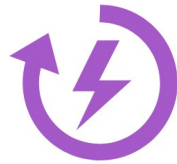

Total Area: 2675 Sq. Mtr. consisting of 16,050 Screw Heads

Sealing of TOTAL END LAPS: End Laps x 2 Nos. x 55 LM = 110 LM + 3 x End Laps x 45 LM = 135 LM = Total LM = 245 x 22% corrugation Slope = 300 LM Grand Total LM = 698
